Executive Summary

Final-year B.E. Artificial Intelligence & Machine Learning student with hands-on experience building intelligent, production-ready AI systems using Python, LLMs, and RAG. Skilled in recommendation systems, semantic search, and scalable backend engineering, with a strong problem-solving mindset and emphasis on secure, maintainable solutions.

Technical competencies

- **AI/ML Frameworks & Tools:** LLM, RAG, Agentic AI, PyTorch, LangChain, LlamaIndex, Hugging Face Transformers, Vector Databases (Pinecone), Embeddings (Sentence Transformers).
- **Programming & Data Processing :** Python, Java, SQL, Pandas, NumPy, ETL Pipelines.
- **Backend & Security:** RESTAPI, FASTAPI JWT, OAuth 2.0, Firebase Authentication.
- **Cloud & Deployment:** GCP, Git/GitHub, Render, Vercel.

Professional Experience

AI/ML Intern, 1M1B (1 Million for 1 Billion) Nov 2025 - Jan 2026

- Developed a citizen-driven sustainability platform to map urban carbon-emission hotspots using geospatial analytics .
- Engineered scalable ETL and visualization pipelines to aggregate community-generated environmental data into interactive dashboards.
- Generated actionable insights by identifying emission hotspots , supporting data-driven sustainability initiatives.

Artificial Intelligence and Data Analytics Intern, Edunet Foundation Oct 2025 - Nov 2025

- Developed SmartLoad-AI, an AI-driven energy forecasting system achieving 87% accuracy using Prophet models.
- Engineered an IoT data preprocessing pipeline to improve data quality through normalization and anomaly handling.
- Automated energy consumption analytics and reporting workflows, enabling identification of usage patterns and optimization opportunities for smart energy management.

Projects

PatternMaster AI – AI-Powered Adaptive DSA Learning Platform [link](#)

- Built an AI-powered DSA learning platform organizing 150 coding problems across 30 algorithmic patterns using React Native, Express.js, Gemini, and SQLite, improving learning efficiency through adaptive pattern-based practice.
- Developed a weighted recommendation engine using mastery score, practice recency, difficulty progression, and interview relevance to personalize daily learning paths.
- Engineered a secure offline-first architecture using Firebase Authentication, JWT, SQLite caching, and REST APIs for low-latency AI-assisted learning.

Production-Grade RAG System for Resume Intelligence [link](#)

- Increased screening efficiency by an estimated 90% by developing a full-stack RAG application to automate resume review and provide instant, context-aware answers.
- Engineered a high-availability, scalable Python backend with FastAPI, using a Pinecone vector database for high-speed semantic search and retrieval.
- Designed a scalable backend architecture with REST APIs, vector similarity search, and modular AI orchestration, enabling secure, low-latency resume intelligence and future extensibility.

Education

B.E. in Artificial Intelligence & Machine Learning, Sri Sairam College of Engineering 2023 – 2027
CGPA: 9.039

Higher Secondary (Class XII), Sri Gurukulam Higher Secondary School, Hosur 2022 – 2023
Percentage: 87%

Certifications & Trainings

Building LLM Applications with Prompt Engineering – NVIDIA Deep Learning Institute (Jul 2025)

IBM AI Engineering Professional Certificate - IBM (April 2026)
